## SUMMARY:

I am a highly skilled Python Developer with 5 years of experience in developing and deploying microservices. I possess excellent analytical and problem-solving skills, and I have a proven track record of delivering high-quality, scalable solutions for complex business problems.

## TECHNICAL SKILLS:

Programming Languages: Python, Java, C++ Frameworks: Django, Flask, FastAPI, Pyramid, Tornado Database Technologies: MySQL, MongoDB, PostgreSQL, Oracle Cloud Platforms: AWS, Google Cloud, Azure Other Tools: Git, Docker, Kubernetes, Jenkins, JIRA

## PROFESSIONAL EXPERIENCE:

ABC Company, Senior Python Developer, Jan 2019 - Present

- Developed and deployed several microservices using Python and Flask framework
- Worked with cross-functional teams to design and implement RESTful APIs for various services
- Implemented unit tests and integration tests to ensure code quality and maintainability
- Utilized Docker and Kubernetes for containerization and orchestration of microservices
- Created and managed CI/CD pipelines using Jenkins for continuous delivery and deployment of services
- Collaborated with DevOps team to monitor and troubleshoot production issues

XYZ Corporation, Python Developer, Jun 2016 - Dec 2018

- Developed and maintained a Python-based web application using Django framework
- Implemented various features such as user authentication, user roles and permissions, and third-party integrations
- Worked with PostgreSQL and MongoDB databases for data storage and retrieval
- Designed and developed RESTful APIs for integration with other services

- Conducted code reviews and provided feedback to team members for code quality improvement
- Participated in agile development process and contributed to sprint planning and retrospectives

#### EDUCATION:

Bachelor's Degree in Computer Science, University of Anytown, May 2016

#### CERTIFICATIONS:

- AWS Certified Developer - Associate, Amazon Web Services, July 2019

#### PROJECTS:

- E-commerce Microservice: Developed a microservice for an e-commerce website using Python, Flask, and PostgreSQL database. Implemented features such as user authentication, shopping cart, and order tracking.
- Movie Recommendation System: Developed a movie recommendation system using Python, FastAPI, and MongoDB database. Utilized collaborative filtering algorithm to recommend movies based on user preferences.
